

US – Market Activities: Alcatel Award for PPC

On the context of its U.S. market strategy PPC Electronic AG could set another important milestone.

At the Alcatel Supplier Day on January 15th and 16th 2004 in Dallas (Tx) to which the world-wide most important suppliers were invited, PPC Electronic AG was selected to receive a recognition award in appreciation of invaluable contribution and participation.

„This recognition fulfils us with pride and is a confirmation of our persistent striving for technology leadership, innovation and highest customer satisfaction!“, says CEO Giorgio Dognini. Moreover, PPC Electronic AG had an interesting and informative presentation on a part of the Alcatel-specifications, derived designs and the corresponding implementation in the production. The excellent co-operation and partnership between both companies were pointed out and underlined also from a technological point of view.

PPC Electronic AG has been active working on the North American Marketplace for 2 years. Many important customers, like Cisco, Alcatel and Jabil belong today to the Key business partners of the company.
